STONE TECHNOLOGY CENTRE

1983

The international buyer / seller meet organised during the fair was again a big success. The venue looked like a business centre with ample scope.

AIGSA is again busy pulling strings to organise and manage the forthcoming fair, STONA 2010. Letters, literature and brochure, concerning the fair, have been despatched to all who matter. The media is being used effectively to reach the audience far and wide.

STONA 2010 will present a super market of natural stone and stone products, natural stone related machinery & tools, natural stone technologies and services. ❖

TANEXPO 2010
The Exhibition for Funeral Sector
Bologna Fair Ground
Bologna, Italy

March 26 – 28, 2010

A Unique Showcase of Funerary Art

TANEXPO a unique showcase of innovative funerary art, has been giving a good and appreciable performance since 1992 at Modena, Italy. In 2008 the exhibition venue was shifted to Bologna to satisfy international nature of the fair and to accommodate the ever increasing number of

Funerary Carriage Made Attractive Presentation at TANEXPO 2008

exhibitors. TANEXPO 2010 is scheduled to be held at Bologna from March 26 – 28, 2010.

Acknowledged as the leading and most authoritative international exhibition for funeral industry it is today considered the point of reference for the worldwide funeral business. It provides biennial opportunity for professionals to congregate in Italy

to see the latest in the sector. The exhibition is supposed to be the only one in the sector where top class producers and innovative products are present in full view for the customers.

After giving fairly good performance in 2008, TANEXPO 2010 is going to be held second time at Bologna from March 26 – 28, 2010. Bologna is situated at a strategic location and is well connected

The Flow of Visitors Kept TANEXPO 2008 Buzzing

with efficient rail and road transport services. Its Marconi International Airport is conveniently linked with overseas airports, as well as with the city and the fair ground with AEROBUS shuttle service.

True to its reputation TANEXPO 2008 attracted 16,000 professionals from the trade, which was up by 10 per cent over 2006 edition of the fair. The exhibition lasted for three days occupying 25,000 sq m of space to accommodate 208 exhibiting companies. It was full of events, meetings and discussions. The design exhibition held during the fair focused on cinerary urns and tombstone accessories. The meetings focused on cremation and new trends in the funeral organisation. Here visitors could see funerary coffins in traditional shapes, as well as in innovative shapes. The Italian artistic tradition merged with innovative technology in the sector could be seen distinctly in funeral cars, showing futuristic models.

The special qualities that makes TANEXPO 2010 a unique venue are jointly linked to the precious synergy from the exhibiting stage and TANEXPO's special features. The visitors coming would see the latest innovations and varieties in funerary items. ❖
